

Efficiency evaluation of energy systems

Kanoglu, Mehmet, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20397657&lokasi=lokal>

Abstrak

This book intends to provide a comprehensive evaluation of various efficiencies used for energy transfer and conversion systems including steady-flow energy devices (turbines, compressors, pumps, nozzles, heat exchangers, etc.), various power plants, cogeneration plants, and refrigeration systems. The book will cover first-law (energy based) and second-law (exergy based) efficiencies and provide a comprehensive understanding of their implications. It will help minimize the widespread misuse of efficiencies among students and researchers in energy field by using an intuitive and unified approach for defining efficiencies.
