

Balancing renewable electricity: energy storage, demand side management, and network extension from an interdisciplinary perspective

Droste-Franke, Bert, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20397987&lokasi=lokal>

Abstrak

This book makes use of existing scenarios to sketch a new structure for Germany's and Europe's electricity system that will be able to cope simultaneously with the fundamental demands for economic efficiency, environmental sustainability and supply security.
