

Data-driven controller design: the H2 approach

Bazanella, Alexandre Sanfelice, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20398169&lokasi=lokal>

Abstrak

This book presents a comprehensive theoretical treatment of the H2 approach to data-driven control design. It features a large number of practical designs performed for different classes of processes: thermal, fluid processing and electromechanical.
