

Geometric control of patterned linear systems

Hamilton, Sarah C., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20398325&lokasi=lokal>

Abstrak

The book assumes no prior background in geometric control theory. The book also adopts a tutorial style by way of examples that illustrate the geometric and abstract algebra concepts used in linear geometric control. In addition, the matrix calculations required for the studied control synthesis problems of linear multivariable control are illustrated via a set of running design examples. As such, some of the design examples are of higher dimension than one may typically see in a text.
