

Restoring lands - coordinating science, politics and action: complexities of climate and governance

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20398764&lokasi=lokal>

Abstrak

This book analyzes why tackling many of these problems is so difficult and why sustainability involves more than adoption of greener, cleaner technologies. Sustainability, as discussed in this book, involves knowledge flows and collaborative decision processes that integrate scientific and technological methods and tools, political and governance structures and regimes, and social and community values. The authors synthesize a holistic and adaptive approach to rethinking the framework for restoring healthy ecosystems that are the foundation for thriving communities and dynamic economies.
