

Cantonese particles and Affixal quantification

Lee, Peppina Po-lun, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20399641&lokasi=lokal>

Abstrak

Cantonese, the lingua franca of Hong Kong and its neighboring province, has an unusually rich repertoire of verbal particles. This volume significantly augments the academic literature on their semantics, focusing on three affixal quantifiers, -saai, -hoi and -maai. The author shows how these verbal suffixes display a unique interplay of syntax and semantics: used in a sentence with no focus, they quantify items flexibly, according to an accessibility hierarchy; with focus, focus comes into effect after syntactic selection. This fresh and compelling perspective in the study of particles and quantification is the first in-depth analysis of Cantonese verbal suffixes. It compares the language's affixal quantification to the alternative determiner and adverbial quantifiers.
