## Abstrak

The book focuses especially on education of young children (4–8 years old) in primary school and presents the underpinning concepts of this approach, and chapters on examples of good practices in a variety of subject matter areas, such as literacy (vocabulary acquisition, reading, writing), mathematics, and arts. Successful implementation of developmental education in the classroom strongly depends on dynamic assessment and continuous observations of young pupils' development. Strategies for implementation of both the teaching practices and assessment strategies are discussed in detail in the book.
