Police organization and training surveys innovations in law enforcement training in its evolution from military-style models toward continuing professional development, improved investigation methods, and overall best practices. International dispatches by training practitioners, academics, and other experts from the US, the UK, Canada, Germany, Hong Kong, and elsewhere emphasize blended education methods, competency-building curricula, program and policy development, and leadership concepts. These emerging paradigms and technologies, coupled with a clear focus on ethical issues, provide a lucid picture of the future of police training in both educational and law enforcement contexts. In addition, the book's training templates are not only instructive but also adaptable to different locales. Featured in the coverage : simulation technology as a training tool, the investigation skill education program and the professionalizing investigation program, redesigning specialized advanced criminal investigation and training, a situation-oriented approach to addressing potentially dangerous situations, developments in United Nations peacekeeping training and combating modern piracy.
