### Abstrak

Penelitian ini bertujuan menguji pengaruh pengawasan fungsional dan pengawasan legislatif terhadap kinerja pemerintah daerah di Indonesia tahun 2011-2012. Kinerja pemerintah daerah diukur dengan skor kinerja yang dikeluarkan oleh Kemendagri dalam Laporan Hasil Evaluasi Peningkatan Kinerja Penyelenggaraan Pemerintahan Daerah untuk LPPD tahun 2011 dan 2012. Pengawasan fungsional diukur dengan latar belakang profesi kepala daerah, latar belakang pendidikan kepala daerah, motif reelection, dan kompetisi politik. Pengawasan legislatif diukur dengan ukuran legislatif. Penelitian dilakukan dengan metode kuantitatif serta pengujian hipotesis dengan menggunakan metode Ordinary Least Square (OLS). Secara keseluruhan, hasil penelitian menunjukkan bahwa latar belakang profesi kepala daerah dan ukuran legislatif berpengaruh positif terhadap kinerja pemerintah daerah, sedangkan latar belakang pendidikan kepala daerah, motif reelection, dan kompetisi politik tidak berpengaruh terhadap kinerja pemerintah daerah.

*This study aims to investigate about the effect of functional and legislative monitoring to the local government performance in Indonesia for the period of 2011-2012. The local government performance is measured by score of Local Government Performance which is released by Ministry of Home Affairs in the form of Local Government Performance Evaluation Report for LPPD 2011 and 2012. Functional monitoring is measured by professional and educational background of local government leader, reelection motive, and political competition and legislative monitoring is measured by size of parliament. Research is conducted with quantitative methods and hypothesis testing using Ordinary Least Square (OLS) method. Overall results reveal that professional background of local government leader and size of parliament positively affect the local government performance. On the other hand, educational background, reelection motive, and political competition do not affect the local government performance.*
