Abstrak

Kemajuan teknologi telah membawa perubahan-perubahan signifikan pada industri farmasi. Dengan menggunakan teknologi modern, industri farmasi kini mampu memproduksi dalam skala besar. Konsumsi masyarakat terhadap produk-produk tersebut cenderung terus meningkat, seiring dengan perubahan gaya hidup masyarakat termasuk pola konsumsinya. Sementara itu, pengetahuan masyarakat masih belum memadai untuk dapat memilih dan menggunakan produk secara tepat, benar, dan aman. Untuk itu, dibentuklah Badan Pengawas Obat dan Makanan (Badan POM) yang memiliki jaringan nasional dan internasional serta kewenangan penegakan hukum dan memiliki kredibilitas profesional yang tinggi. Praktek Kerja Profesi Apoteker (PKPA) dilaksanakan pada 2 – 26 September 2014 di Badan POM bertujuan untuk memahami tugas dan fungsi Badan POM. Memahami tugas, fungsi, dan kegiatan Direktorat Surveilans dan Penyaluran Keamanan Pangan, serta memahami peran apoteker di Badan POM.

.....

Technology advancement has brought significant changes on the pharmaceutical industries. Those industries are able to produce a large-scale of products. The product consumption tends to be increased in line with the change of community life style, including their consumptive behavior. Meanwhile the community capacity is not yet appropriate to do selection and use the products in rational and safe way. Therefore, National Agency of Drug and Food Control (NA-DFC) is established with a national and international networking, authority to conduct law enforcement and highly credible professionalism. Pharmacist internship conducted on 2 to 26 September 2014 at National Agency of Drug and Food Control (NA-DFC) aims to understand the duties and functions of NA-DFC. It also gives knowledge and insight about duties, functions and activities at the Directorate of Food Safety Surveillance and Counseling, as well as understanding the role of pharmacist at NA-DFC.
