

From the earth's core to outer space

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405392&lokasi=lokal>

Abstrak

This book focuses on four themes : (1) evolving earth's crust, (2) changing Baltic Sea, (3) climate change, and (4) planet earth, third stone from sun. The focus on these four topics provides both a state of the art review of earth science topics of particular importance to Scandinavia and the Baltic and also the global context in which a consideration of these topics must be made. It finishes by discussing our use of space born technologies for understanding these topics and places the earth within the context of our neighbouring planets and their satellites.
