

The dilemma of boundaries : toward a new concept of catchment

Taniguchi, Makoto, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405673&lokasi=lokal>

Abstrak

Recent findings on the interaction of water from land, oceans, and the atmosphere encourage researchers to undertake collaborative work that goes beyond the boundaries of each discipline, be it oceanography, surface and subsurface hydrology, climatology, or glaciology. Drawing on all these fields, the book focuses on two major boundaries, that between surface water and ground water, and that between terrestrial water and ocean water.
