

Advanced X-ray crystallography

Rissanen, Kari, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405787&lokasi=lokal>

Abstrak

In the book discussed about computational studies of crystal structure and bonding, cryo-crystallography (diffraction at low temperature and more), high-pressure crystallography, chemical X-ray photodiffraction (principles, examples, and perspectives), and powder diffraction crystallography of molecular solids.
