

Composite materials : science and engineering

Chawla, Krishan K, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405832&lokasi=lokal>

Abstrak

Composite materials, offers integrated and completely up-to-date coverage of composite materials. The book focuses on the triad of processing, structure, and properties, while providing a well-balanced treatment of the materials science and mechanics of composites. In this edition, revised and updated throughout, increasing use of composites in industry (especially aerospace and energy) and new developments in the field are highlighted. There is a new chapter on non-conventional composites, which covers polymer, metal and ceramic matrix nanocomposites, self-healing composites, self-reinforced composites, biocomposites and laminates made of metals and polymer matrix composites. Examples of practical applications in various fields are given throughout the book.
