

Electrochemical production of metal powders

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405847&lokasi=lokal>

Abstrak

This new volume of modern aspects of electrochemistry reviews different methods for the production of metal powders including mechanical, chemical and electrochemical powders. Electrochemically produced metal powders are of high purity and they are extremely active during sintering. These powders find a wide-range of applications in automotive, aerospace, energy device and electronics industries.
