

Non-thermal food engineering operations

Ortega-Rivas, Enrique, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405956&lokasi=lokal>

Abstrak

This book presents a comprehensive treatise of all normally used food engineering operations that are carried out at room (or ambient) conditions, whether they are aimed at producing microbiologically safe foods with minimum alteration to sensory and nutritive properties, or they constitute routine preparative or transformation operations. It reviews theoretical concepts, analyzes their use in operating variables of equipment, and discusses in detail different applications in diverse food processes.
