

Principles of polymer chemistry

Ravve, A., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406018&lokasi=lokal>

Abstrak

The third edition covers both physical and organic chemistry. Thus kinetics and thermodynamics of polymerization reactions are discussed. This edition is also distinct from all other polymer textbooks because of its coverage of such currently hot topics as photonic polymers, electricity conducting polymers, polymeric materials for immobilization of reagents and drug release, organic solar cells, organic light emitting diodes. This textbook contains review questions at the end of every chapter, references for further reading, and numerous examples of commercially important processes.
