

Green solvents I : properties and applications in chemistry

Mohammad, Ali, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406111&lokasi=lokal>

Abstrak

Green solvents volume I and II provides a throughout overview of the different types of solvents and discusses their extensive applications in fields such as extraction, organic synthesis, biocatalytic processes, production of fine chemicals, removal of hydrogen sulphide, biochemical transformations, composite material, energy storage devices and polymers.
