

Isu-isu strategi pembangunan perpustakaan digital

Fiqru Mafar, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406692&lokasi=lokal>

Abstrak

Technology advancement has created a new form of library which is the digital library. Currently many library organizers are competing with each other in developing digital library. The development has raised new issues on library fields. Those issues are related to digital preservation, copyrights, plagiarism and human resources. The issues have also brought out the needs of breaking strategies to be implemented in the real world. Through this paper, writer intends to discuss about strategies that can be used in handling issues related to development of digital library. The writer hopes that the strategies can be implemented in organizing digital library.
