

Perpustakaan digital dan prospeknya menuju resource sharing

Umami Rodliyah, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406705&lokasi=lokal>

Abstrak

Digital library requires good cooperation between institutions that own collections that can be shared. Most of our libraries are facing dilemmatic problems of the importance of digitization as a demand and high cost. The alternative solution for those problems is cooperation between library and resource sharing which in certain terms can save budget as well as maximize the utilization of information sources. With resource sharing, it is expected that the quality of library services will get better to meet user's need.
