

Model-based engineering of embedded systems : the SPES 2020 methodology

Pohl, Klaus, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406889&lokasi=lokal>

Abstrak

This book provides a comprehensive overview of the Software Platform Embedded Systems (SPES) modeling framework and demonstrates its applicability in embedded system development in various industry domains such as automation, automotive, avionics, energy, and healthcare. In SPES 2020, twenty-one partners from academia and industry have joined forces in order to develop and evaluate in different industrial domains a modeling framework that reflects the current state of the art in embedded systems engineering.
