

Orang Kolok dan Orang Inget: Studi kasus tentang inklusi sosial difabel ketulian dan penanganan kesehatan indera di Desa Bengkala, Buleleng, Bali

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406907&lokasi=lokal>

Abstrak

Kolok's people in Bengkala is people with hearing impairment and deafness. The number of those people in Bengkala are 40 or about 2% of total inhabitants. People in Bengkala have created social inclusion culturally for the Koloks. The same opportunity are given to them the same as it is given to "normal" people, the Ingets. By handling social inclusion, auditory health cares in Bengkala can be used as a pilot program so there will be an empowerment in dealing with the disables to be able to live normal life properly.
