

Urban environment assessment: special reference to terrestrial and aerial photographic approaches

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20408292&lokasi=lokal>

Abstrak

The following discussion particularly stresses the techniques or research methodologies concerned with urban environment assessment. Given the fact that monitoring the quality of the urban environment is prime, some practical approaches to that problem are seriously needed. Due to the complex nature of the urban environment in terms of the elements, interrelationships of elements, and dynamic nature of their interactions, the author devises a model in the form of a combination approach to assess the urban environmental condition.
