Abstrak

The European Summer School in Logic, Language and Information (ESSLLI) is organized every year by the Association for Logic, Language and Information (FoLLI) in different sites around Europe. The main focus of ESSLLI is on the interface between linguistics, logic and computation. ESSLLI offers foundational, introductory and advanced courses, as well as workshops, covering a wide variety of topics within the three areas of interest, language and computation, language and logic, and logic and computation. The papers are organized in topical sections on computational complexity, multi-agent systems, natural language processing, strategies in games and formal semantics.
