<b>ABSTRACT</b><br>
This thesis discusses the effect of leverage on the company's investment sub-sector manufacturing base and chemical industry listed in Indonesia Stock Exchange in the period 2010-2014. This study examines the leverage and other internal factors such as cash flow, company size and growth rate as control variables. Based on research conducted shows that there is a significant negative correlation to investment leverage a company, in which the investment in question are net fixed assets., This thesis discusses the effect of leverage on the company's investment sub-sector manufacturing base and chemical industry listed in Indonesia Stock Exchange in the period 2010-2014.
