Abstrak

Kehidupan remaja merupakan kehidupan yang sangat menentukan bagi kehidupan masa depan mereka selanjutnya. Perilaku pacaran remaja di zaman sekarang telah mengarah pada perilaku yang diluar batas seperti, perilaku seks, dan tidak menutup kemungkinan untuk melakukan perilaku seks yang tidak semestinya di lakukan. Penelitian ini bertujuan untuk mengetahui hubungan sikap permisif terhadap perilaku pacaran di SMK Purnama Jakarta Selatan tahun 2015. Penelitian ini menggunakan desain cross sectional, dengan sampel 110 orang siswa-siswi kelas X dan XI berusia 15-17 tahun, dan dianalisis menggunakan metode chi-square. Hasilnya diperoleh 28,2% siswa melakukan perilaku pacaran beresiko, umur pertama pacaran dan sikap permisif memiliki hubungan yang bermakna dengan perilaku pacaran, dimana siswa yang umur pertama pacaran <14 tahun memiliki peluang 2,4 kali berperilaku pacaran berisiko dibandingkan siswa yang umur pertama pacaran 14 tahun. Demikian pula siswa yang memiliki sikap permisif memiliki peluang 4,8 kali lebih besar berperilaku pacaran berisiko dibanding siswa dengan sikap tidak permisif terhadap perilaku pacaran.

.....

Adolescence is an essential period considering it has great impact for shaping up future life as an adult. Current dating behaviors in adolescents had changed toward indecent behaviors such as sexual intercourse, which is inappropriate for their age. This research was aimed to determine the relationship between permissive attitude toward dating behavior in Purnama Vocational School in South Jakarta in 2015. The design used in this research was cross-sectional, 110 students in total samples used were students in X and XI levels with age between 15-17 years old, and Chi-square method was used for research analysis, the result indicated that 28,2 % students of Purnama Vocational School had dating relationship behaviors at risk, result showed that age of first dating, in concurrent with permissive attitude, had meaningful relationship with dating behaviors. Students who had their first dating in age less than 14 years old had chance of 2,4 times more dating behaviors at risk compared to students who had their first dating in age greater than or equal to 14 years old. Furthermore students with permissive attitude had chance of 4,8 times more dating behaviors at risk compared to students with non-permissive attitude toward dating behavior.
