[<b>ABSTRAK</b><br>

Penelitian ini bertujuan untuk menguji dampak perusahaan yang termasuk dalam indeks syariah terhadap struktur modal perusahaan. Pengukuran tingkat leverage menggunakan proksi debt to equity ratio (DER), dan jangka waktu utang dengan proksi short term debt (STD). Kemudian dilihat pengaruhnya pada kinerja perusahaan dengan proksi return on equity (ROE), dan market to book ratio (MBR). Penelitian ini menggunakan data 640 perusahaan non finansial yang terdaftar di Bursa Efek Indonesia (BEI) dan Bursa Malaysia dengan priode tahun 2011 hingga 2014. Model regresi yang digunakan dalam penelitian ini adalah data panel melalui metode OLS Pooled dengan Generalized Least Square (GLS). Penelitian menghasilkan dua kesimpulan yang pertama, jenis perusahaan berbasis syariah merupakan faktor yang dapat mempengaruhi pemilihan struktur modal perusahaan yang kedua pada akhirnya faktor determinan struktur modal ini juga mempengaruhi kinerja perusahaan.
