Abstrak

[**ABSTRAK**]

Konflik agraria semakin hari semakin sering terjadi, ini dikarena oleh sumber daya tanah yang semakin terbatas dibanding dengan pertumbuhan tingkat penduduk. Dampak lainnya adalah nilai tanah yang semakin mahal membuat tanah menjadi ajang perebutan bagi pihak-pihak tertentu. Metode yang digunakan dalam penelitian ini menggunakan metode kualitatif dengan metode wawancara mendalam (in-depth interview). Informan yang digunakan dalam penelitian ini sebanyak 10 orang.

Menurut Ronny Rahman Nitibaskara konflik memiliki cakupan yang cukup luas, meliputi pertentangan atau bentrokan, persaingan, atau gangguan oleh kelompok secara fisik atau benturan antar kekuatan-kekuatan yang sulit didamaikan atau pertentangan-pertentangan dalam tataran kualitas seperti ide-ide, kepentingan atau kehendak. Semua makna konflik tersebut, tampaknya pada waktu belakangan ini cukup ramai terjadi di Indonesia. Mediasi adalah salah satu proses alternatif penyelesaian masalah diluar pengadilan untuk dapat tercapai suatu solusi (perdamaian) yang saling menguntungkan para pihak. Dengan konflik dapat diselesaikan dengan saling menguntungkan dari kesepakatan mediasi tersebut diharapkan dapat menunjang ketahanan wilayah.

ABSTRACT

Agrarian conflicts increasingly frequent, this dikarena by land resources are more limited than the growth rate of the population. Another effect is that the more expensive land values make the scene of the seizure of land for certain parties. The method used in this study using qualitative methods with in-depth interviews (indepth interview). Informants were used in this study as many as 10 people.

According to Ronny Rahman Nitibaskara conflict has broad enough coverage, covering conflict or clash, competition, or interference by the group physically or clashes between the forces that are difficult be reconciled or contradictions in the level of quality of such ideas, interests or the will. All the

meanings of the conflict, it seems at times quite crowded lately occurred in Indonesia. Mediation is one of the alternative process issues out of court settlement to be reached a solution (peace) the parties mutually beneficial. With the conflict can be resolved with mutual benefits of the mediation agreement is expected to support the resilience of the region , Agrarian conflicts increasingly frequent, this dikarena by land resources are more limited than the growth rate of the population.
