Abstrak

[**ABSTRAK**]

Penelitian ini membahas mengenai evaluasi efektivitas sistem pengendalian internal pada siklus persediaan pada Perum BULOG. Persediaan merupakan aset yang memiliki nilai paling besar dibandingkan aset lainnya pada Laporan Posisi Keuangan Perum BULOG. Sistem pengendalian internal pada siklus persediaan diperlukan untuk meningkatkan keandalan akun persediaan pada laporan keuangan. Penelitian ini adalah penelitian kuantitatif dengan studi kasus pada Perum BULOG Subdivre ?X?. Pengumpulan data dan informasi diperoleh melalui observasi, pengumpulan prosedur terkait siklus persediaan dan pengendalian internal yang sudah ada, wawancara dan melalui survei dengan menggunakan kuesioner kepada para pegawai di Perum BULOG Subdivre ?X?. Dari penelitian ini diketahui bahwa Efektifitas Sistem Pengendalian Internal Siklus Persediaan pada Perum BULOG Subdivre ?X? cukup baik untuk meningkatkan keandalan akun persediaan pada laporan keuangan. Seluruh komponen pengendalian internal siklus persediaan telah dilaksanakan dengan cukup efektif, namun masih harus ditingkatkan agar efektivitasnya meningkat.
