Abstrak

[ABSTRAK

Penelitian ini dilakukan untuk menganalisis faktor-faktor yang memengaruhi permintaan India terhadap minyak kelapa sawit Indonesia, dengan cakupan lalu lintas perdagangan dikhususkan hanya kepada perdagangan Indonesia dengan India (importir terbesar). Dengan menggunakan data ekspor kelapa sawit kuartalan tahun 2000-2010, dilakukan pendekatan ekonometri dengan menggunakan model koreksi kesalahan (Error Correction Model). Penelitian menemukan bahwa guncangan pada kuantitas perdagangan, harga minyak kedelai, serta nilai tukar rupiah pada satu kuartal sebelumnya terbukti berpengaruh signifikan terhadap volume ekspor kelapa sawit Indonesia ke India. Sedangkan harga minyak kelapa sawit terbukti tidak signifikan memengaruhi permintaan ekspor kelapa sawit Indonesia ke India.

ABSTRACT

This study was conducted to analyze the factors that affect the demand for India against Indonesian palm oil, focuses only for trade between Indonesia and India (the largest importer). By using palm oil export quarterly data for 2000-2010 period, econometric approach using error correction model (Error Correction Model) is applied in this study. The study found that shocks to the quantity of trade, the price of soybean oil, as well as the exchange rate on the previous quarter proved to significantly influence the volume of Indonesian palm oil exports to India. While palm oil prices proved to be significantly affect the demand for Indonesian palm oil exports to India., This study was conducted to analyze the factors that affect the demand for India against Indonesian palm oil, focuses only for trade between Indonesia and India (the largest importer).
