Abstrak

[ABSTRAK
 Studi ini mempelajari perilaku obsesif-kompulsif seseorang dengan fobia sosial menggunakan alat ukur yang sudah peneliti evaluasi. Studi ini bertujuan untuk melihat hubungan antara perilaku obsesif-kompulsif dengan social fobia yang dimiliki partisipan. Sebanyak 194 mahasiswa dari University of Queensland menjadi partisipan studi ini dengan mengisi kuesioner yang peneliti sebar. Hasil penelitian menunjukkan korelasi positif antara perilaku obsesif-kompulsif dengan sosial fobia. Semakin tinggi hasil skor dari perilaku obsesif-kompulsif yang dimiliki partisipan, semakin tinggi juga hasil skor dari sosial fobia.ABSTRACT This study investigated individual's obsessive-compulsive behaviour with social phobia using a new evaluated measurement. This study aims to see an association between obsessivecompulsive behaviour with social phobia in the participants. There are 194 students from University of Queensland contributed in this study by filling in a set of questionnaires. This study showed that there was a positive correlation between obsessive-compulsive behaviours with social phobia. The higher the score of the obsessive, This study investigated individual's obsessive-compulsive behaviour with social phobia using a new evaluated measurement.
