Abstrak

[ABSTRAK
 Setelah bergabung dengan UE, ekonomi negara-negara Visegrad semakin terbuka dan mengalami peningkatan

PDB. Hal ini disebabkan oleh kebijakan liberalisasi perdagangan, yang telah diterapkan sejak negara-negara Visegrad masih dalam tahap persiapan keanggotaan UE. Kebijakan liberalisasi perdagangan yang diterapkan berupa peningkatan kuota, penghapusan bea, dan kemudahan dalam regulasi pada barang impor. Di pihak lain,

UE juga memperoleh keuntungan dengan bergabungnya negara-negara Visegrad karena pangsa pasar UE semakin luas.ABSTRACT Having joined the European Union, the economy of the Visegrad countries become more open and get the

increase of the GDP. This is due to the trade liberalization policy, which has been applied since the Visegrad countries were still in the preparation stage of the EU membership. The trade liberalization policy that was implemented is in the form of the quota increase, the elimination of the duties, and the ease in the regulations on

the imported goods. On the other hand, the EU also get the benefit by joining the Visegrad countries because the

EU's market share more expand;Having joined the European Union, the economy of the Visegrad countries become more open and get the
