[ABSTRAK

Peningkatan angka urbanisasi di daerah perkotaan menimbulkan banyak masalah kesehatan. Masalah kesehatan ini berdampak pada seluruh rentang usia termasuk remaja. Seorang remaja belum memiliki kemampuan untuk mengambil keputusan dan berpikir jauh ke depan. Hal ini menyebabkan remaja masuk kedalam kelompok yang rentan mengalami masalah kesehatan. Salah satu risiko masalah kesehatan yang terjadi akibat dampak dari urbanisasi adalah obesitas pada remaja. Obesitas menyebabkan terjadinya gangguan citra tubuh pada remaja. Karya ilmiah ini bertujuan untuk menggambarkan asuhan keperawatan keluarga dengan masalah obesitas pada remaja (An.I) di Kelurahan Sukamajubaru Kecamatan Tapos Kota Depok. Setelah dilakukan beberapa kali intervensi keperawatan yaitu berupa pengaturan pola makan, berat badan An.I mengalami penurunan dari 85 kg menjadi 84 kg. Penurunan berat badan ini pada akhirnya dapat mengatasi masalah gangguan citra tubuh pada An.I. Keluarga diharapkan dapat terus memberikan dukungan kepada An.I dengan tetap menerapkan pengaturan pola makan di rumah.
