[ABSTRAK
 Apotek merupakan salah satu sarana penunjang kesehatan yang turut berperan dalam mewujudkan upaya kesehatan yang dilaksanakan oleh pemerintah. Menurut Peraturan Pemerintah No. 51 tahun 2009 tentang Pekerjaan Kefarmasian, dalam ketentuan umum dijelaskan bahwa apotek adalah sarana pelayanan kefarmasian tempat dilakukan praktek kefarmasian oleh apoteker. Sebagai tempat pengabdian apoteker, apotek berfungsi untuk melaksanakan peracikan, pengubahan bentuk, pencampuran dan penyerahan obat atau bahan obat, dan sebagai sarana penyalur perbekalan farmasi yang harus menyebarkan obat yang diperlukan masyarakat secara meluas dan merata. Apotek juga berperan sebagai sarana pemberian informasi obat kepada masyarakat dan tenaga kesehatan lainnya sehingga kedua pihak tersebut mendapatkan pengetahuan yang benar tentang obat dan turut meningkatkan penggunaan obat yang rasional. Selain sebagai tempat pengabdian apoteker, apotek juga berfungsi sebagai lahan bisnis. Apotek yang dikelola dengan baik akan memberikan keuntungan yang cukup besar. Oleh karena itu, apoteker perlu mengetahui konsep manajemen dan bisnis di apotek.ABSTRACT The pharmacy is one of the means of supporting health that playing a role in creating health measures undertaken by the government. According to Government Regulation No. 51 of 2009 on pharmaceutical works, in general terms explained that the pharmacy is a pharmaceutical care facilities conducted by a pharmacist that do pharmacy practices. As a dedicated place for pharmacist, pharmacy carry out a function for compounding, changing the form, mixing and delivery of the drug or drug substance, and as a means of channeling pharmaceuticals that has to deploy the necessary drugs is widespread and equitable for society. Pharmacies also serve as a means of drug information to the public and other health professionals so that both parties gain the knowledge of medicine and helped improve the rationality of drug used. Apart from being a dedicated pharmacist, pharmacy also serves as a business area. Pharmacies are well managed will provide considerable advantages. Therefore, pharmacists need to know the concept of business management and pharmacy.v, The pharmacy is one of the means of supporting health that playing a role in creating health measures undertaken by the government.
