[ABSTRAK
 Industri farmasi merupakan salah satu industri yang menyangkut kesehatan manusia dalam rangka perwujudan kesehatan nasional. Dalam pembuatan obat, industri farmasi harus memenuhi persyaratan CPOB (Cara Pembuatan Obat yang Baik). CPOB merupakan pedoman pembuatan obat yang baik dan benar diseluruh aspek rangkaian produksi yang bertujuan untuk memastikan bahwa sifat maupun mutu obat yang dihasilkan senantiasa memenuhi persyaratan mutu yang telah ditentukan dan disesuaikan dengan tujuan penggunaannya. Kedudukan Apoteker juga diatur dalam CPOB, yaitu sebagai penanggung jawab produksi, pengawasan mutu dan pemastian mutu sehingga seorang Apoteker dituntut untuk mempunyai wawasan, pengetahuan, keterampilan, dan kemampuan dalam mengaplikasikan dan mengembangkan ilmunya secara profesional agar dapat mengatasi permasalahan-permasalahan yang ada di industri farmasi.ABSTRACT The pharmaceutical industry is one of industry that involves human health in the context of national health embodiment. In the manufacture of drugs, the pharmaceutical industry must meet the requirements of GMP (Good Manufacturing Practice). GMP guidelines for the drug production is good and true in all aspects of the production chain that aims to ensure that the nature and quality of medicines produced continuously meet the quality requirements that have been decided in line with the intended use. Position of Pharmacists are also set in the GMP, which is in charge of production, quality control and quality assurance so that a pharmacist is required to have the insight, knowledge, skills, and ability to apply and develop their knowledge in a professional manner in order to overcome the problems that exist in the pharmaceutical industry;The pharmaceutical industry is one of industry that involves human health in the context of national health embodiment.
