

Crop production for agricultural improvement

Muhammad Ashraf, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20417354&lokasi=lokal>

Abstrak

In this book we have mainly focused on physiological, biochemical, molecular and genetic bases of crop development and related approaches that can be used for crop improvement under environmental adversaries. In addition, the adverse effects of different biotic (diseases, pathogens etc.) and abiotic (salinity, drought, high temperatures, metals etc) stresses on crop development and the potential strategies to enhance crop productivity under stressful environments are also discussed.
