Abstrak

"The Sobotta Atlas covers the complete macroscopic anatomy in full detail and exceptional quality with almost 2000 figures. This Atlas is organised by body regions - this corresponds to the topics for course attendance certificates. Simple new introductions and general overviews help you to understand the more complex figures and connections - step by step. The new Sobotta comes with even more clinical figures, including new imaging techniques, endoscopic images, intraoperative colour photographs of inner organs, pictures from patients with common paralysis and more - designed to be suitable for any type of curriculum."--
