Abstrak

The book is widely considered a seminal work in the subject of evolutionary cognition. However, Deacons book was the first step, further steps have had to be taken. The proposed anthology is such an important associate.

The contributions are written by a wide variety of scholars each with a unique view on evolutionary cognition and the questions raised by Terrence Deacon, emergence in evolution, the origin of language, the semiotic 'missing link', Peirce's semiotics in evolution and biology, biosemiotics, evolutionary cognition, Baldwinian evolution, the neuroscience of linguistic capacities as well as phylogeny of the homo species, primatology, embodied cognition and knowledge types.
