

Modeling forest trees and stands

Burkhardt, Harold E., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20417991&lokasi=lokal>

Abstrak

This book provides a comprehensive summary of state-of-the-art methods for empirical modeling of forest trees and stands. It opens by describing methods for quantifying individual trees, progresses to a thorough coverage of whole-stand, size-class and individual-tree approaches for modeling forest stand dynamics, growth and yield, moves on to methods for incorporating response to silvicultural treatments and wood quality characteristics in forest growth and yield models, and concludes with a discussion on evaluating and implementing growth and yield models.
