

Cellular physiology and metabolism of physical exercise

Livio Luzi, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20417992&lokasi=lokal>

Abstrak

The book covers areas of cellular physiology and metabolism that are of interest to scientists involved in research in diabetes and metabolic diseases. Some chapters of the book are specifically research-oriented, as all the authors are actively practicing either bench or clinical research in the area. In particular, the book discusses classical aspects of cellular physiology and the metabolism of physical exercise, as well as novel topics like exercise in transplantation and exercise in beta-cell failure, which mark the frontiers of research in sport-related sciences and research.
