

Compact models and measurement techniques for high-speed interconnects

Sharma, Rohit, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20418395&lokasi=lokal>

Abstrak

Compact models and measurement techniques for high-speed interconnects provides detailed analysis of issues related to high-speed interconnects from the perspective of modeling approaches and measurement techniques. Particular focus is laid on the unified approach (variational method combined with the transverse transmission line technique) to develop efficient compact models for planar interconnects.
