Abstrak

[**ABSTRAK**]

Tujuan tesis ini dilakukan untuk mengevaluasi kebijakan P2KPDT di Kabupaten Barru. Penelitian dilaksanakan dengan metode kuantitatif dengan pendekatan Analytical Hierarchy Process (AHP). Penelitian dilaksanakan dengan cara menyebar kuisioner kepada para ?expert? sebanyak 32 responden yang terdiri dari pelaksana kebijakan dan dianggap paling tahu permasalahan kegiatan P2KPDT di Kabupaten Barru.

Fokus penelitian ini adalah memberikan penilaian pada bobot fokus dan kriteria kegiatan yang disusun secara sistematis dalam suatu hirarki melalui skala perbandingan. Fokus kegiatan yang diberikan bobot terdiri dari : peningkatan kandungan lokal, pelibatan stakeholders secara substansial dalam suatu kemitraan strategis, peningkatan ketahanan dan kemandirian ekonomi, pembangunan berkelanjutan, Pemanfaatan hasil pembangunan oleh sebagian besar masyarakat lokal, pengembangan usaha kecil dan menengah, penguatan kapasitas dan peningkatan kualitas SDM. Sedangkan kriteria kegiatan yang diberikan bobot terdiri dari : Efektifitas, Efisiensi, Kecukupan, Responsifitas dan Ketepatan. Alternatif kebijakan yang dipilih adalah : Status quo, Kegiatan dialihkan dengan modifikasi dan Kegiatan dihentikan.

Hasil penelitian menunjukkan bahwa kegiatan P2KPDT di Kabupaten Barru lebih menonjol pada sisi peningkatan kandungan lokal, hal tersebut ditunjukan dengan bobot prioritas tertinggi dalam analisis (0,337) dibandingkan dengan 6 fokus pelaksanaan kegiatan yang lain. Secara umum pada setiap fokus kegiatan kriteria efektifitas merupakan kriteria yang paling penting dalam pelaksanaan kegiatan. Bobot tertinggi (0,451) adalah pada fokus Penguatan kapasitas dan peningkatan kualitas SDM. Hasil sintesa hirarki dan analisis keseluruhan menujukan bahwa rekomendasi alternatif kebijakan yang disarankan di masa yang akan datang adalah kegiatan dihentikan dengan bobot tertinggi sebanyak 0,498.
