

A geometric approach to differential forms

Bachman, David, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20418889&lokasi=lokal>

Abstrak

This text presents differential forms from a geometric. The author approaches the subject with the idea that complex concepts can be built up by analogy from simpler cases, which, being inherently geometric, often can be best understood visually. The second edition includes a completely new chapter on differential geometry, as well as other new sections, new exercises and new examples. Additional solutions to selected exercises have also been included.
