

A royal road to algebraic geometry

Holme, Audun, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20418912&lokasi=lokal>

Abstrak

This book is about modern algebraic geometry. The book starts by explaining this enigmatic answer, algebraic geometry. From a point of departure in algebraic curves, the exposition moves on to the present shape of the field, culminating with Alexander Grothendieck's theory of schemes. Contemporary homological tools are explained.
