

Approximation methods for polynomial optimization : models, algorithms, and applications

Zhening, Li, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20419242&lokasi=lokal>

Abstrak

In this brief the authors discuss some important subclasses of polynomial optimization models arising from various applications, with a focus on approximations algorithms with guaranteed worst case performance analysis. The brief presents a clear view of the basic ideas underlying the design of such algorithms and the benefits are highlighted by illustrative examples showing the possible applications.
