

Competing risks and multistate models with R

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20419529&lokasi=lokal>

Abstrak

This book covers competing risks and multistate models, sometimes summarized as event history analysis. These models generalize the analysis of time to a single event (survival analysis) to analysing the timing of distinct terminal events (competing risks) and possible intermediate events (multistate models). Both R and multistate methods are promoted with a focus on nonparametric methods.
