

Representations of finite groups : local cohomology and support

Benson, David J., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20419927&lokasi=lokal>

Abstrak

This book presents the solution of a long-standing problem concerning the stable module category (of not necessarily finite dimensional representations) of a finite group. The proof draws on commutative algebra, cohomology of groups and stable homotopy theory. The unifying theme is a notion of support which provides a geometric approach for studying various algebraic structures.
