

Human geography

Malinowski, Jon C., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20420089&lokasi=lokal>

Abstrak

Geographers believe that phenomena on the Earth's surface are not random, but the result of a complex series of processes going on at the local, regional, national and international scale. This book introduces the reader to how geographers make sense of the diverse reality of human populations on the Earth's surface.
