

Construction and expression of immunotoxin anti EGFRvIII scFv-HPR conjugate in pichia pastoris as a targeted drug candidate for cancer therapy

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20420382&lokasi=lokal>

Abstrak

Epidermal growth factor receptor variant III (EGFRvIII) is a mutant EGFR lacking 267 amino acids (exon-2 through 7) within its extracellular domain, resulting in the formation of a new epitope as a tumor-
