Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20421262&lokasi=lokal>

Abstrak

[Dalam penelitian ini, peneliti ingin menjelaskan pembelajaran teknik kejahatan pemerasan seksual siber di dalam penjara. Pembelajaran teknik kejahatan di dalam penjara itu dibagi ke dalam dua cara yakni, pertama dengan cara interaksi tatap muka, kedua dengan cara otodidak (learning by doing). Pembelajaran teknik kejahatan di dalam penjara bisa terjadi karena adanya kelemahan dalam manajemen pengamanan di dalam lapas. Di antaranya adalah kurangnya sumber daya manusia dan kurangnya infrastruktur. Pembelajaran teknik kejahatan akan di analisa menggunakan teori differential association, dan tingkah laku jahat yang berpindah ke dunia maya di analisa menggunakan space transition theory. In this research paper, researchers want to describe and explain how can cyber sexual extortion in deep of prison can happen. Especially, learning the techniques of cyber sexual extortion within the prison was divided into two ways, first by way of face-to- face interactions, both by way of autodidact/self-taught (learning by doing). Learning the techniques of crime in prison can happen because of the weakness in the management of security in the prison, among these are the lack of human resources and lack of infrastructure. Learning the techniques of crime will be analyzed using the theory of differential association, and evil behaviour the migrate to the virtual world in the analysis using the space transition theory., In this research paper, researchers want to describe and explain how can cyber sexual extortion in deep of prison can happen.
